

TATTOO AFTERCARE

1. Leave bandage on for 2-3 hours.
2. Before removing bandage, wash hands with soap and warm water.
3. Remove bandage and wash tattoo with soap and warm water.
4. Pat dry with clean towel, wait 10 minutes, then pat dry again with another clean towel or paper towel.
5. Never bandage again.
6. Apply a very small amount of Bacitracin or Vitamin A&D Ointment to tattoo.
7. If ointment is visible on your skin, too much has been used. Wipe off any excess with a clean hand.
8. Avoid soaking tattoo in any water, including saltwater, chlorine pools and bathwater. Showers will not harm your tattoo.
9. Avoid prolonged exposure to both direct sunlight and tanning beds.
10. If scab forms, do not scratch or pick.
11. Most people's tattoos will heal in 10-15 days.
